SUMMARY

I am a graduate of computer and network engineering with good academic/non-academic achievements from Walisongo 2 Gempol Vocational School. During school, I was also active as a tool man and also often attended online/offline training. Apart from that, I am also a freelancer. I understand matters relating to network systems, cyber security supported by the ability to configure network devices, the Linux server operating system, recognition bugs that exist on the website and operating system. I am also able to communicate well in Indonesian.
